[BONUS] EAGER TO KEEP LEARNING? TRY THESE:

Practice Command Line shortcuts at shortcutFoo. Oh man, this is going to help you be *real* efficient. If you really want, we think the $8/month is worth it (at least for these next 2 months) to help you get efficient in Command Line and (surprise) Git, but it's definitely not necessary.

You might not know it yet, but your bootcamp bestie is going to be Git and GitHub. If you love ShortcutFoo, you should 100% continue your lessons and jump into the Git shortcut dojo. You have already begun to get familiar, but practice makes perfect. You may want to run through Try.GitHub another time for practice, followed by GitImmersion. Some people prefer this Git course from Udemy, though. Go forth & Git, my friends.

Practice makes perfect. If you're looking for even more places to stretch your new coding muscles, try out programming by doing or codingbat, and Microsoft's Virtual Academy!
